

MarLar Homes

To: Daniel Li
Subject: Universal Solar

Daniel, as you are aware, we have installed solar panels from Universal Solar in one of our remodeled homes in Highland Park, Il. Marlar Homes www.marlarhomes.net owns many single family homes in the northern suburbs of Chicago, Colorado and Boca Raton, Fl.

We found your solar panels to be efficient, cost effective and at the high end of industry standards. Based on that we will now be adding Universal panels to many of our investment properties.

In addition to reducing energy costs, as investors, we believe that adding your solar increases the value of our houses well beyond the cost of the installation. We will be in contact with Universal shortly to order panels for our next projects.

Regards,

Larry Spatz
